

KnowItAll Automate

Say goodbye to repetitive steps of analyzing each of your spectra one by one

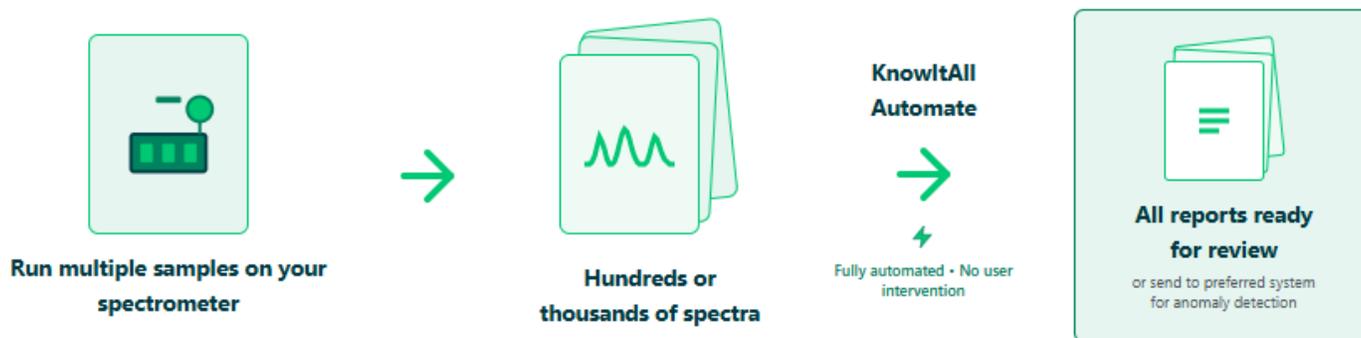

With KnowItAll Automate, automate routine spectral analyses so you can focus on critical insights and what you do best. Using a simple software developer's kit (SDK), integrate KnowItAll's powerful software and comprehensive spectral libraries* with your workflow. KnowItAll Automate conducts spectral library searches automatically and generates reports for review—all in the background without opening the GU

Traditional manual, repetitive process

Repeat all steps manually for every single spectrum

⚡ Using KnowItAll Automate

Save a tremendous amount of time • Process up to thousands of spectra in one batch

No need to open KnowItAll • Perfect for failure analysis • Ideal for repetitive workflows

* Must have current licenses for the KnowItAll software, database, and/or classification models. KnowItAll Automate requires its own license.
