

## IR - Sadtler Biochemicals - Wiley

Spectra - 590

---

### Description

---

A Biochemical is defined as any chemical compound which is part of the makeup of living cells or produced from organic sources.

This database contains 590 infrared spectra of a variety of chemical compounds classified as biochemicals. This database includes peptides, amino acids, carbohydrates, nucleic acids, sugars, lipids, steroids, terpenes, alkaloids, glycosides, carotenoids, flavonoids, etc. They can be buffers, reagents, enzymes, dyes, and a number of different organic compounds.

### Additional Information

---

Each compound is listed by its chemical name or commercial name. Pertinent physical and chemical data is included when available.

*This collection has been subject to the Sadtler Data Review Protocol™ to provide you with the highest standard in spectral data today. These rigorous qualifying procedures start at data acquisition and continue throughout the database development process.*
