

IR - Industrial Chemicals, Pure Organic Compounds - Wiley

Spectra - 20,315

Description

This FT-IR spectral collection contains 20,315 spectra (18,570 with structures) of organic compounds, used as industrial chemicals. 5,600 of these spectra are literature spectra and recalculated from peak tables with intensity and half bandwidth information.

Additional Information

In addition to the molecular structure, the following information is supplied when available: chemical name, purity, melting point, boiling point, density, molecular formula, molecular weight, CAS Registry number, measurement conditions, resolution, and comments.
