

IR - Sadtler Hydrocarbons - Wiley

Spectra - 1,055

Description

This database contains 1,055 infrared spectra of hydrocarbon compounds that can be used in the identification, classification, and verification of these materials.

Additional Information

Each compound is identified by its chemical name and method of analysis, as well as structural formula, molecular formula, and molecular weight. Synonyms, melting point, boiling point, literature references, and comments are displayed when available.

This collection has been subject to the Sadtler Data Review Protocol™ to provide you with the highest standard in spectral data today. These rigorous qualifying procedures start at data acquisition and continue throughout the database development process.
