

IR - Sadtler Phosphorus Compounds - Wiley

Spectra - 1,110

Description

This database contains 1,110 infrared spectra of phosphorus compounds. This collection of organic compounds can be used for identification, classification, and verification of these materials.

Additional Information

Each compound is identified by its chemical name and the method of analysis, as well as structural formula, molecular formula, and molecular weight. Synonyms, melting point, boiling point, literature references, and comments are also included if available.

This collection has been subject to the Sadtler Data Review Protocol™ to provide you with the highest standard in spectral data today. These rigorous qualifying procedures start at data acquisition and continue throughout the database development process.
